

VACCINATION POLICY

Thomas Aquinas College asks that students provide the dates of their latest immunizations as well as copies of immunization records in compliance with the Department of Health:

- The American College Health Association and Ventura County Department of Health require that all students present documented proof of immunity to measles and rubella.
- Tetanus and Diphtheria boosters should be received every 10 years throughout life.
- Meningococcal Meningitis should be given within the last three years.
- A Tuberculin test is required for students who have been outside the country in the 12 months prior to enrolling in the College. A chest x-ray is required if the Tuberculin test is positive.

Thomas Aquinas College's vaccination policy (as shown above) can also be found on the "Emergency Information and Health Data" form that is sent to incoming students by the Admissions Office after a student has been accepted to the College. A copy of the "Emergency Information and Health Data" form can be requested from the Admissions Office at any time.
